# PROBLEM STATEMENT

In today's digital age, students and professionals need a centralized platform to showcase their skills and projects. Traditional resumes are static and limiting. A self-developed digital portfolio solves this by providing a dynamic and comprehensive showcase of one's abilities and creativity.

# OVERVIEW

This project involved developing a fully responsive, single-page portfolio website from scratch using HTML, CSS, and JavaScript. The objective was to create a professional online presence that highlights my educational background, technical skills, academic projects, and interests in AI/ML, serving as an interactive resume and central hub for my academic career.

# WHO ARE THE END USERS?

- ❑ **Recruiters & Companies:** To assess technical skills and project experience for internships and entry-level positions.
- ❑ **University Professors & Peers:** For academic collaboration, project reviews, and networking.
- ❑ **Hackathon & Project Collaborators:** To understand my skill set for potential team formations.
- ❑ **Myself:** A living document of my learning progress and achievements in AI/ML.

# TECHNIQUES

- ❑ **Frontend:** HTML5, CSS3, JavaScript (ES6+)
- ❑ **Styling:** Custom CSS with Flexbox & Grid for layout
- ❑ **Icons & UI:** Font Awesome Icons
- ❑ **Design Principles:** Mobile-First Responsive Design
- ❑ **Version Control:** Git & GitHub
- ❑ **Code Editor:** VS Code

# DESIGN AND LAYOUT

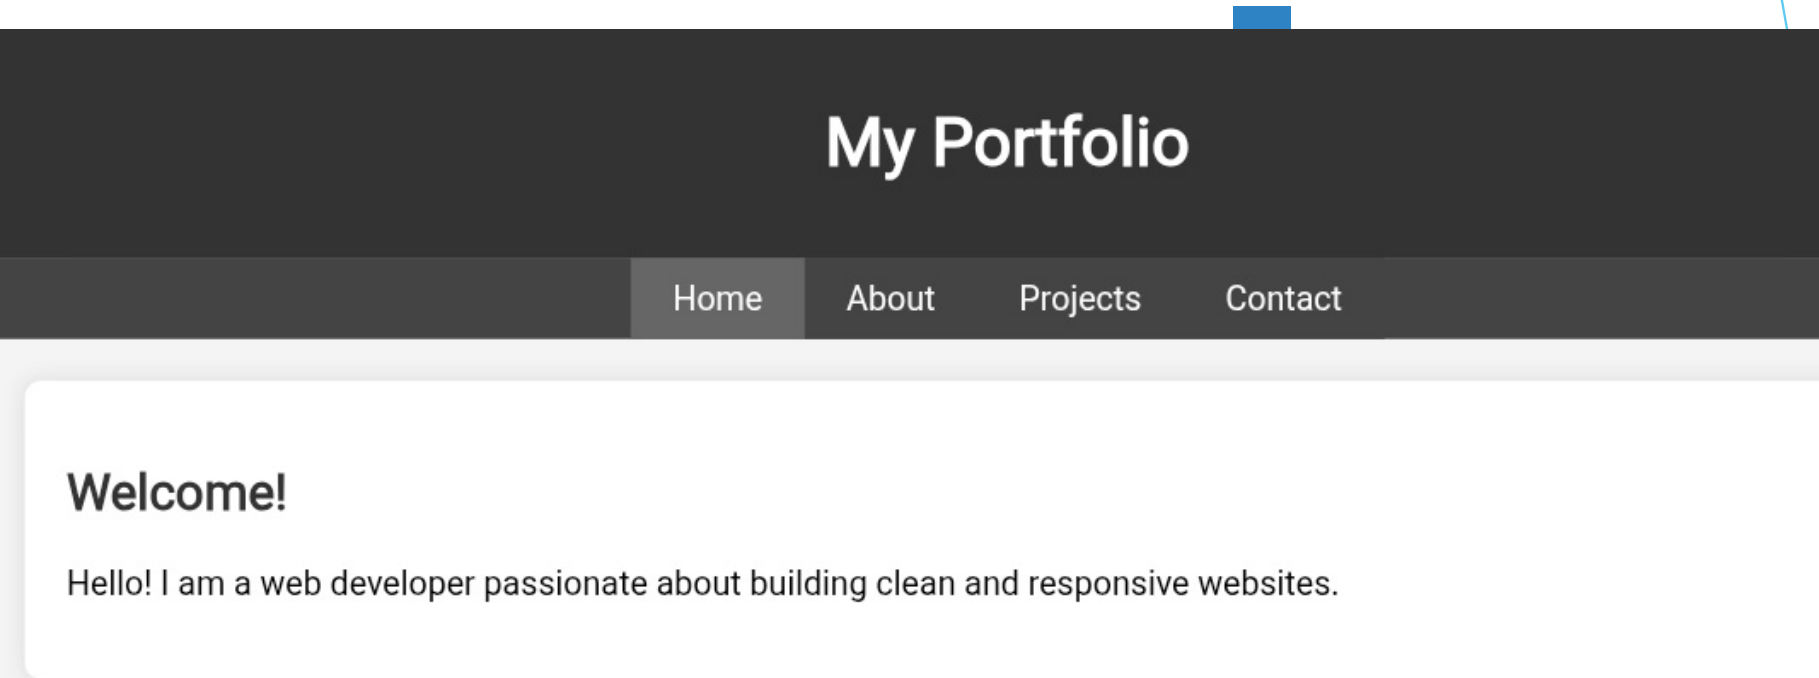

1. **Navigation Bar:** Fixed header with links to all sections.
2. **Hero:** Personal introduction with call-to-action buttons.
3. **About:** Personal bio and key skill tags.
4. **Education:** Timeline of academic qualifications.
5. **Projects:** Grid layout showcasing 3 projects with tech stacks.
6. **Skills:** Visual skill bars categorized by Programming, AI/ML, and Web Tech.
7. **Interests:** Card-based layout for AI/ML passions.
8. **Contact:** Contact information and functional form.
9. **Footer:** Social media links and copyright.

# FEATURES

- ❖ **Fully Responsive:** Adapts seamlessly to desktop, tablet, and mobile devices.
- ❖ **Interactive UI:** Smooth scrolling navigation, hover effects on buttons and cards.
- ❖ **Dynamic Skills Section:** Visual progress bars to quantify proficiency levels
- ❖ **Functional Contact Form:** Client-side validation for user inputs.
- ❖ **Mobile-Friendly Navigation:** Hamburger menu for smaller screens.

# RESULTS AND SCREENSHOTS

# CONCLUSION

This portfolio project was an excellent practical application of front-end development skills. It successfully demonstrates my ability to design, code, and deploy a modern, responsive website. More than just a project, it acts as the primary showcase for my AI/ML journey, highlighting my technical skills, projects, and passion for the field. It is a foundational asset that I will continually update throughout my academic and professional career.
